

Transformation  
Through  
Automation

January 28, 2025

# IPClear Team

John Brzozowski, Co-Founder

Jason Weil, Co-Founder

Brian Eury, PhD, Partnerships

Mark Ewen, Sales

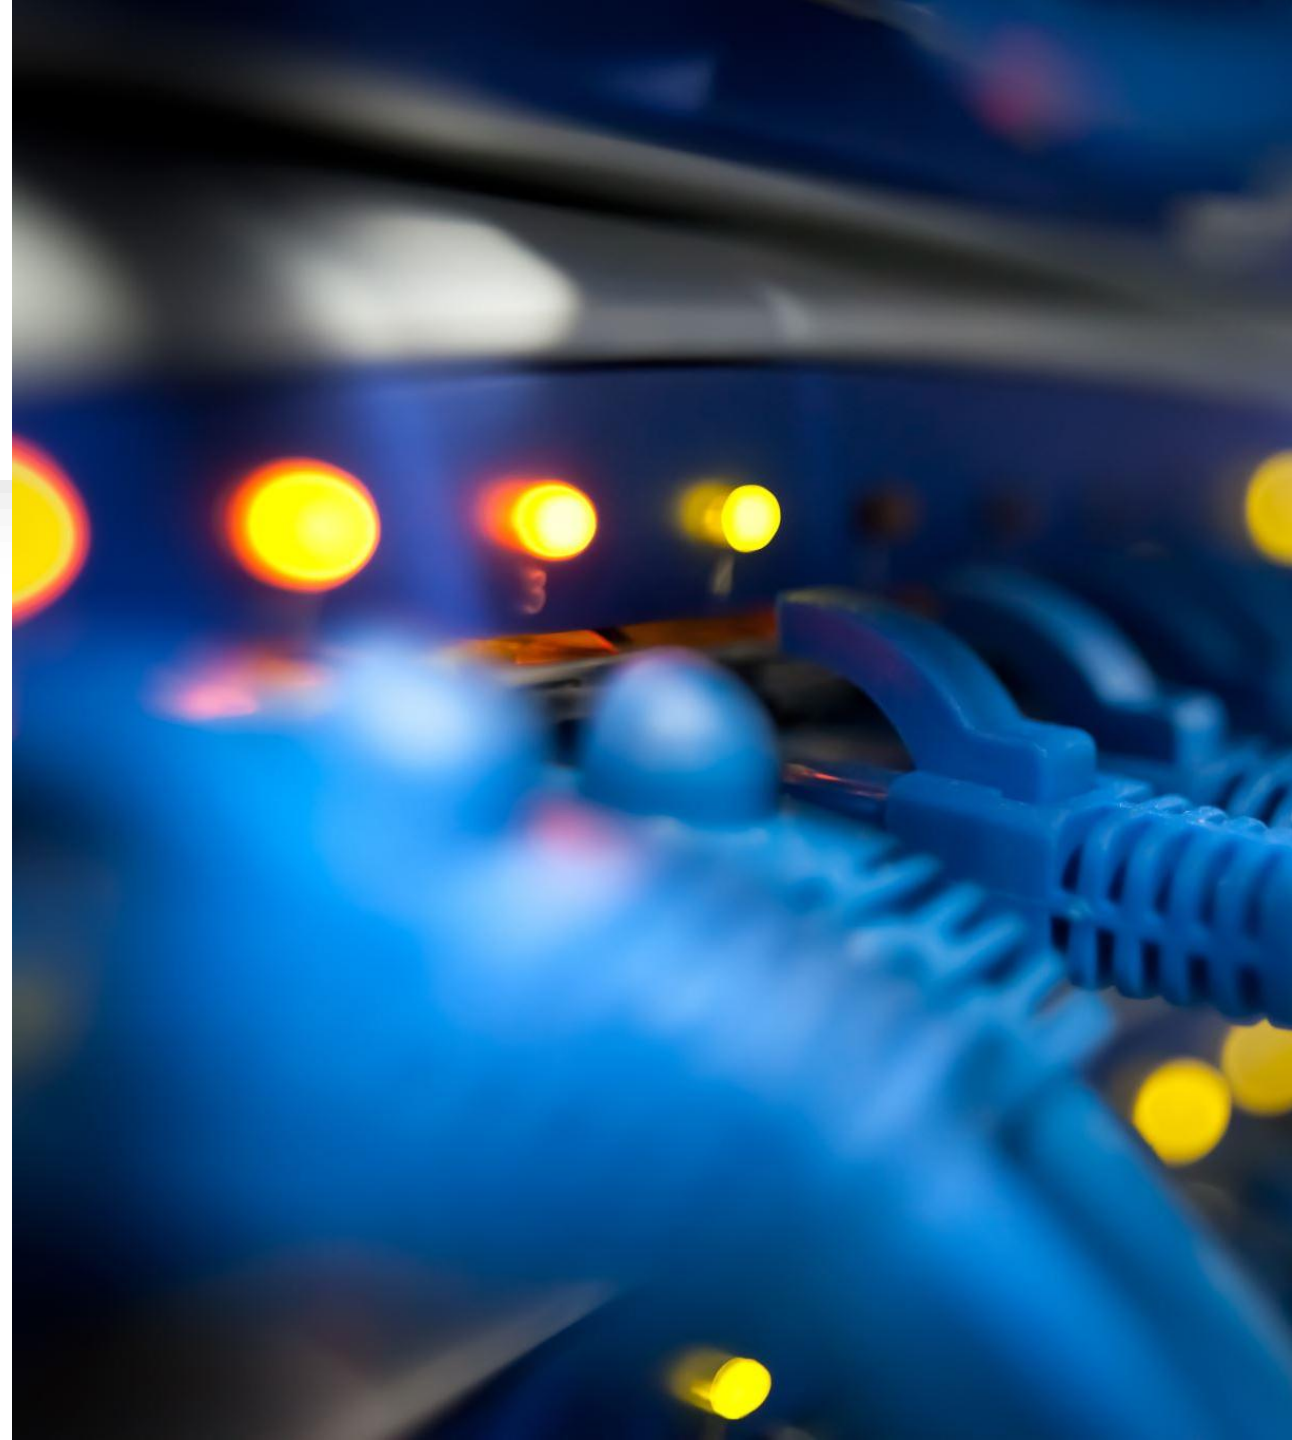

# IPv4 Address Scarcity

- IPv4 addresses were depleted over a decade ago
- Internet Service Providers, Cloud Providers etc. require IPv4 addresses to scale their businesses
- Legacy holders of large IPv4 blocks can generate significant capital while modernizing their network

# Network Transformation

- Transformational, not transactional  
*(IPClear is not an IPv4 broker)*
- IPClear's automation platform is leveraged in the delivery of managed services
- Installation and deployment of enhanced, redundant edge infrastructure as part of the service
- No mass numbering is required
- No network disruption during transformation project

# Benefits For Higher Education

**Bring in millions of dollars in unrestricted revenue** by reclaiming your organization's legacy IPv4 resources.

**Secure the technology infrastructure** with our robust security analysis that helps you find and fix vulnerabilities with minimal disruptions and resources.

**Optimize the network**, improving performance, reliability, and security and introducing support for evolving Internet technologies

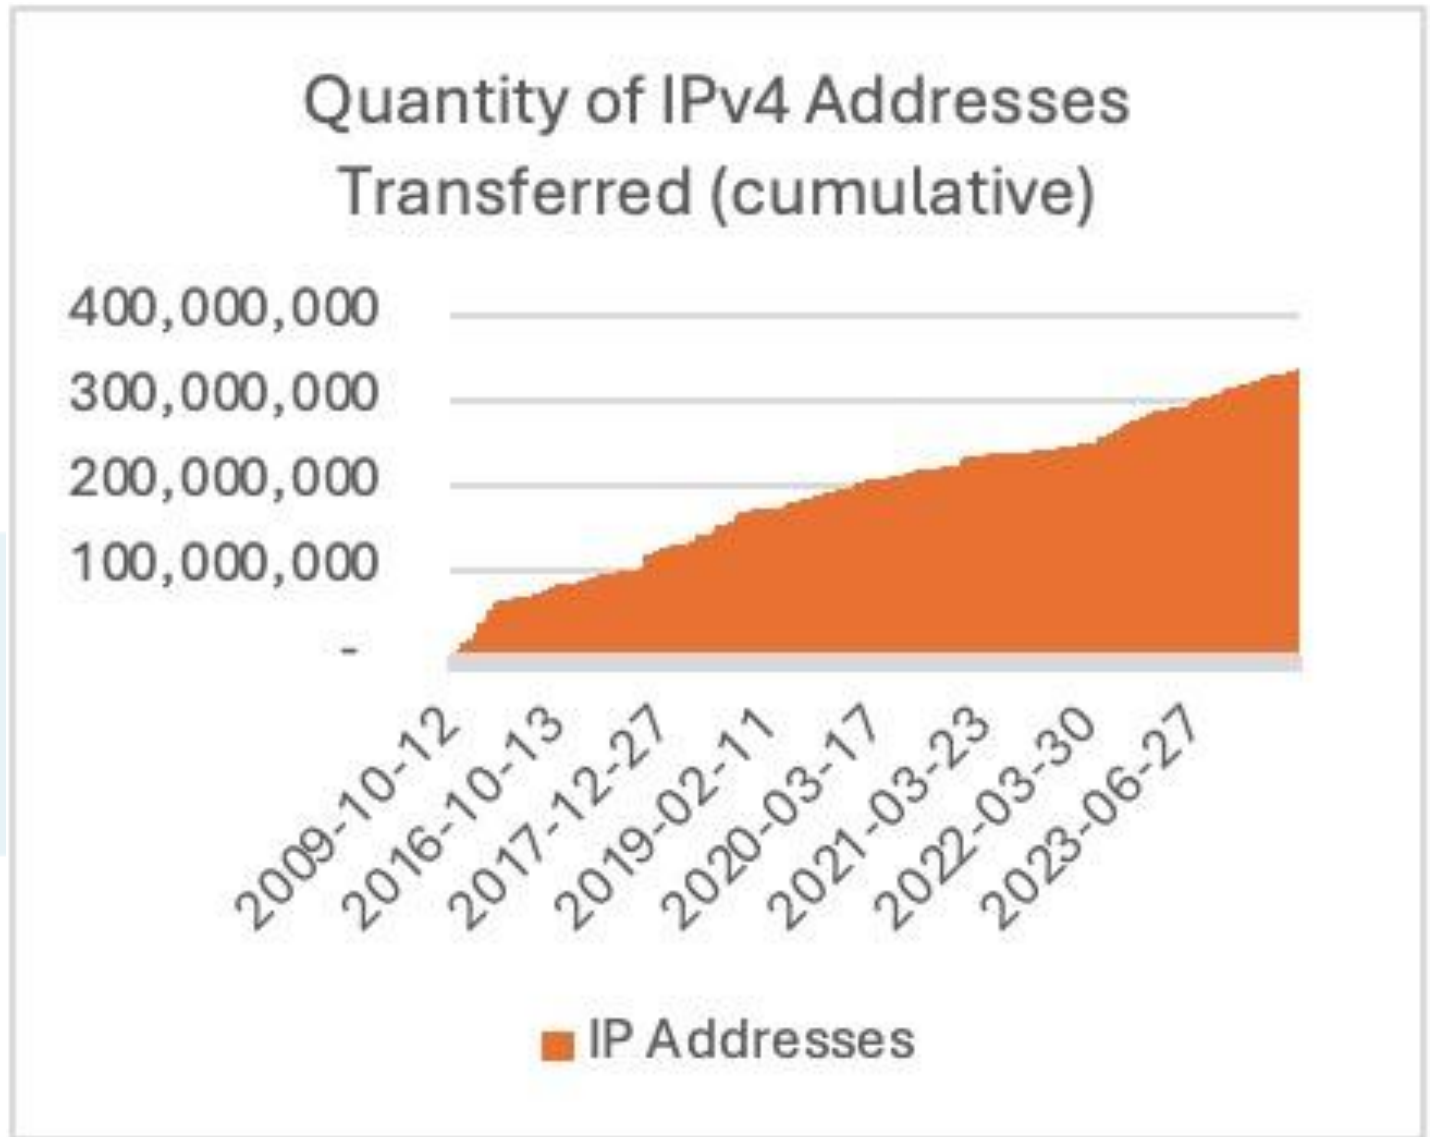

# IPv4 Block Transfers (over 100 Institutions since 2019)

Central Carolina Technical College
Clarke University
Colleges and Institutes Canada
Dalhousie University
The Office of the Institution formerly known as Medaille University
Jamestown College
Schoolcraft College
University of Manitoba
California College of the Arts
County College of Morris
